

## Mod. **NB** CONVEYOR BELT

The **Mod. NB Conveyor Belt** is an innovative conveyor belt designed and built to be produced with industrialized systems, with exceptional qualities of simplicity, versatility and stoutness compared to the systems currently existing on the market. The multiple possibilities of combinations of its components allow the **Mod. NB conveyor belt** to be configured to meet the most different needs also ensuring, with a few simple operations, any changes or future reconfigurations. In fact, by adding or removing non-structural components, it is possible to change from the hollow belt system to the flat belt system on rolls and to the sliding/flat belt system and vice versa or even to the hybrid or mixed roll/sliding system, with the possibility to change its width. The versatility of use, the standardization of the product, the simplicity of assembly and the ease of maintenance and transport qualify this conveyor belt system with the highest price/quality ratio existing today on the market.
